## WARNING / 注意

- 1. Be very careful to avoid directly staring at the laser beam. It can cause serious damage to the eyesight.
- Please use the voltage within the designated range. Avoid turning ON and OFF the Product during a short period of time since it can cause damage to the Product.
- Laser diodes are very sensitive to the change in the temperature. Usage under low temperature is recommended for longer use.
- 4. Noise filter must be used when the motor solenoid is directly linked to the power. Authorization of noise or voltage surge can destroy the laser diode and lead to the lighting failure.
- This Product is a very precise optical instrument. Be careful not to drop it. Severe shock to the Product can cause malfunction.
- Do not disassemble, repair or rebuild the Product at your own discretion. After sales services are not available in the case of arbitrary disassembly, repair or rebuilding.

For improvement of the Product the design and specifications are subject to change without prior notice
